**ADDENDUM NUMBER 2**

For:

**IVES BARN**

1585 Cheshire Street  
Cheshire, Connecticut

GDA Project 21010

November 15, 2010

The Drawings and Specifications prepared by Gilley Design Associates, Architects, LLC and Santo Domingo Engineering entitled "Stabilization and Rehabilitation of Ives Cheshire Barn, 1585 Cheshire Street, Cheshire, Connecticut " Project 21010, dated the 25<sup>th</sup> of October, 2010 are hereby amended in the following particulars:

<b><u>Item #</u></b>	<b><u>Item</u></b>	<b><u>Description</u></b>
1	Bonds	No bonds are required.
2	Alternate Construction Techniques	We have received several phone calls with a variety of approaches to construction. Most involve "Means and Methods" issues and those are properly at the discretion of the Contractor. However, keep in mind that this is an historic preservation project. The Owner is getting significant funding through a preservation grant. The Secretary of the Interior's Guidelines <u>must</u> be followed! That means, among other things retaining as much historic material as possible and repairing or replacing with like materials. If you are not prepared to follow these Guidelines, don't bid!
3	Replacement Lumber	Another source of salvaged period lumber material is the website of The Connecticut Trust for Historic Preservation. Go to "Restoration Resources Directory" and click on "Architectural Salvage".

END OF ADDENDUM TWO

No further addenda will be created.
